1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "tranformer", "processor" and "re-tranformer" of amended claim 10 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. It is noted that Applicants' Fig. 1 is merely a "flow chart".

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 10-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Original claim 10 recites "a processor ..., comprising:

a means for transforming ...

a means for iterative ...

a means for re-tranforming ..."

Application/Control Number: 10/662,627

Art Unit: 2193

The examiner believes / analyzes that the "means for transforming" and "means for iterative working off" are corresponding to the "32 bit **CPU**" and "crypto **coprocessor**", respectively (see specification, page 13, first complete paragraph or original claim 11). Therefore, the amended claim 10 raises a new matter with the specified elements "transformer" and "processor" and "re-transformer".

3. Claims 10-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The terms "processor" (amended terms for "means for iterative working off") are confused with the terms "processor" in the preamble of the claims.

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1-9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Rejection grounds continue to be those set forth in the previous office action dated September 15, 2005.

Independent claim 1 adds the "cryptographic algorithm"; however, it doesn't look like they've tied the result to the practical application (cryptographic algorithm) so as to

Application/Control Number: 10/662,627 Page 4

Art Unit: 2193

make it a practical application of the mathematics. Instead, it looks like they're just identified that the data being manipulated is coming from a cryptographic algorithm. Since there is no physical transform to establish a pratical application, a useful, concrete and tangible result appear to be lacking. Therefore, claims 1-9 are clearly directed to a non-statutory process. Also, see "Interim Guigelines for Examination of Patent Applications for Patent Subject Matter Eligibility" OG Date: 22 November 2005.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
